                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       RESULT 2

C44379

Omega-conotoxin SVIB [validated] - cone shell (Conus striatus)

N/Alernate names: SNX-183

C/Species: Couns eritatus (striated cone)

C/Species: Conus eritatus (striated cone)

C/Species: Conus eritatus (striated cone)

C/Species: Conus eritatus

C/Species: Construction 31-Dec-1993 #text_change 15-Sep-2000

interleukin-1 beta precursor - rabbit
Nicternate names: hematopoietin-1; IL-1 beta; lymphocyte proliferation potentiating fact. C.Species: Oryclolagus cuniculus (domestic rabbit)
C;Bote: 25-May-1989 #sequence revision 22-Nov-1996 #text_change 09-Jul-2004
C;Accession: A27714; A30584; JU0082; A32166
E;Mori, S.; Goto, F.; Goto, K.; Obkawara, S.; Maeda, S.; Shimada, K.; Yoshinaga, M. Biochem. Biophys. Res. Commun. 150, 1237-1243, 1988
A;Title: Cloning and sequence analysis of a cDNA for lymphocyte proliferation potentiatirly A;Recession: A27714; MUID:88134238; PMID:2449207
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Afmolecule type: mRNA

A,Residues: 1-268 <VOU>
C,Comment: This protein lacks a conventional signal sequence for protein export. Cleavage
C,Comment: This protein-lbeta, unlike interleukin 1-alpha, is inactive.
C,Comment: Interleukin-lbeta precursor is less heavily myristoylated than interleukin-lal
C,Superfamily: interleukin-l
C,Keywords: cytokine; immunoregulation; inflammation; lymphokine; macrophage; mitogen
F;117-268/Product: interleukin-l beta #status predicted <LLB>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Glycoprotein A - mouse
Glycoprotein A - mouse
C.Species: Mus musculus (house mouse)
C.Species: O2-Jun-1998 #sequence_revision 10-Jul-1998 #text_change 15-Jun-2001
C.Accession: JE0120
R.Haidaris, C.G.; Medzihradsky, O.F.; Gigliotti, F.; Simpson-haidaris, P.J.
DNA Res. S., 77-88, 1998
A.Title: Molecular characterization of mouse Pneumocystis carinii surface glycoprotein A. A.Title: Molecular characterization of mouse Pneumocystis carinii surface glycoprotein A. A. Molecula type: mRNA
A.Molecule type: mR

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         RESULT 56

TO1055

Hypothetical protein YUP8H12R.38 - Arabidopsis thaliana
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Date: 05-Feb-1999 #sequence_revision 05-Feb-1999 #text_change 09-Jul-2004
C;Accession: T01055
R;Theologis, A.; Vysotskaia, V.S.; Osborne, B.I.; Schwartz, J.R.; Federspiel, N.A.; Kwan Oefner, P.; Davis, R.W.
submitted to the EMBL Data Library, May 1998
A;Description: Arabidopsis thaliana chromosome 1 YAC YUP8H12R sequence.
A;Reference number: 214227
